

The Janus face of electrons in superconductors with high transition temperature

Rudi Hackl

Walther-Meissner-Institut, D-85748 Garching,
Bayerische Akademie der Wissenschaften

Objectives:

- ⇒ Electronic Raman scattering
- ⇒ Conventional superconductors with strong coupling
- ⇒ Cuprates
- ⇒ $\text{Ba}(\text{Fe}_{1-x}\text{Co}_x)_2\text{As}_2$

Funded by the DFG via Research Unit FOR538 and Priority Program SPP1458

<http://for538.wmi.badw.de/>

Experiments:

- B. Muschler
- W. Prestel
- H. Eiter
- N. Munnikes
- T. Buttler
- F. Venturini
- L. Tassini
- M. Opel

Theory:

- T.P. Devereaux (Stanford)
- C. Di Castro, M. Grilli,
S. Caprara (Roma)
- I Tüttö
- A. Zawadowski (Budapest)

Samples:

- H. Berger, L. Forró (Lausanne)
- A. Erb, M. Lambacher (WMI)
- B. Revaz (Genève)
- Yoichi Ando (Osaka)
- Shimpei Ono (Tokyo)
- A. Damascelli (Vancouver)
- M. Greven (Stanford)
- H. Eisaki (Tsukuba)
- I. R. Fisher, Jim Analytis, Jin-Haw Chu (Stanford)

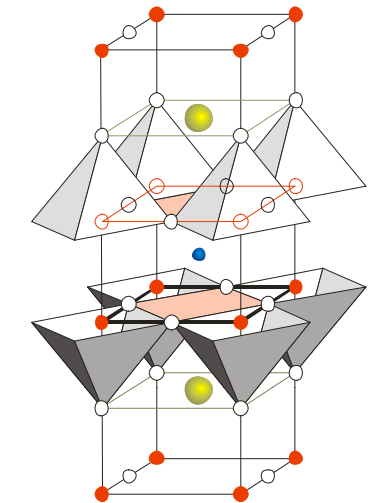

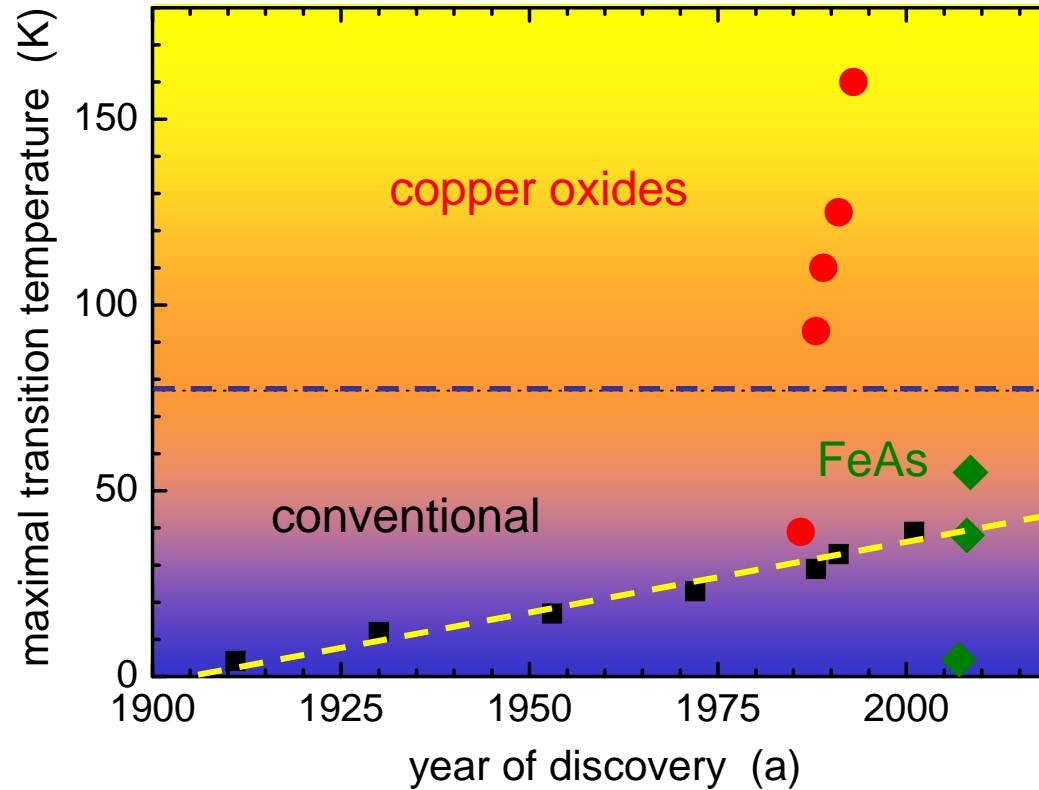

Conventional and unconventional superconductors

Nb_3Sn

MgB_2

$YBa_2Cu_3O_{6+x}$

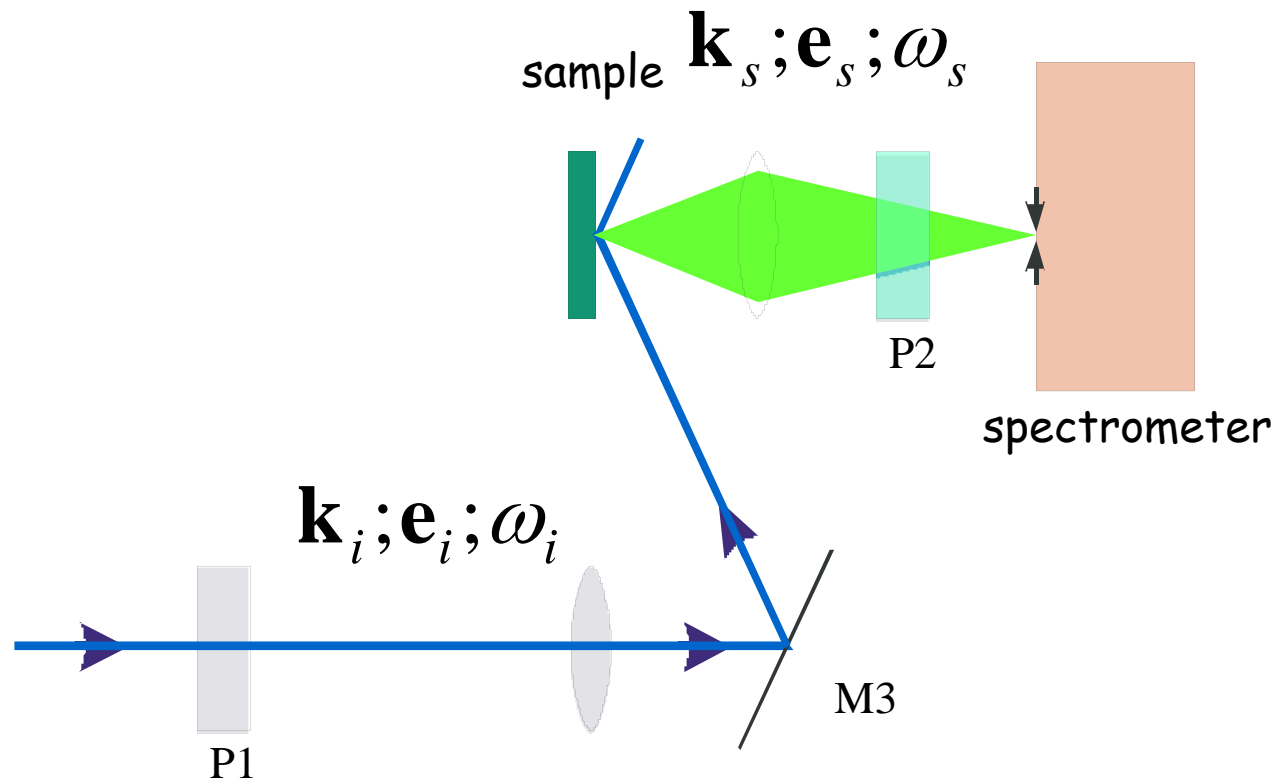

$Ba(FeAs)_2$

Electronic Raman scattering

strongly coupled conventional SC
cuprates

Raman Experiment

$$\Omega = \omega_i - \omega_s$$

optical conductivity

$$\sigma = \text{diagram with two vertices labeled } j$$

current – current correlation

vertex v_F

Raman scattering

$$\chi = \text{diagram with two vertices labeled } \gamma$$

“density“- “density“ correlation

vertex $[m(\mathbf{k})]^{-1}$

Conductivity vs. Raman (normal state)

$$\text{Im } \chi(\Omega) \propto \Omega \text{Re } \sigma(\Omega)$$

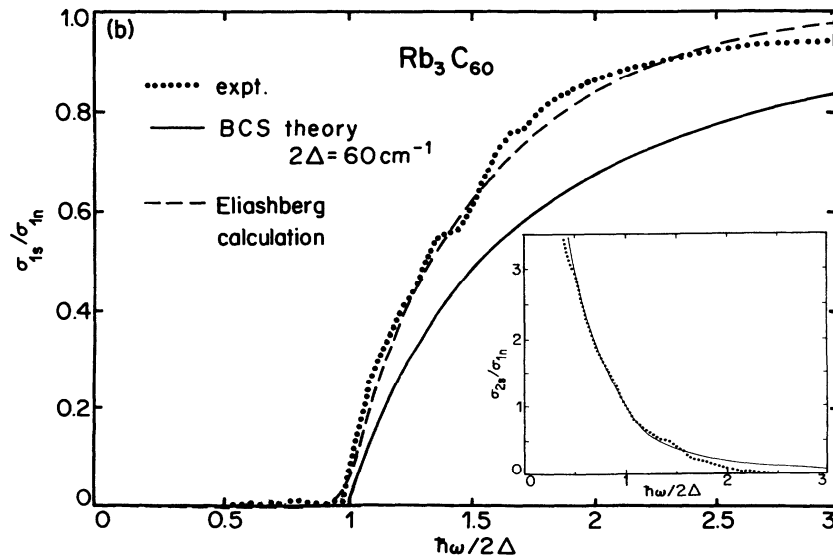

Shastry and Shraiman
PRL **65**, 1068 (1990)

$$\chi_{\mu}(\Omega) = \frac{M_{\mu}(\Omega)}{\Omega + M_{\mu}(\Omega)}$$

$$M(\Omega) = \Omega \lambda(\Omega) + \frac{i}{\tau(\Omega)}$$

Opel, ..., Tüttö et al.
PRB **61**, 9752 (2000)

Conductivity vs. Raman (superconducting state)

Rb_3C_{60}

Degiori et al.
PRB **49**,
7012 (1994)

Dierker, Klein
Webb, Fisk
PRL **50**, 853 (1983);
R.H. et al. JPC **16**,
1729 (1983)

Nb_3Sn

Sum rules

f sum rule
conservation of carriers

no sum rule

$$[\hat{H}, \hat{\rho}_{Raman}] \neq 0$$

Selection rules

entire Fermi surface

polarization dependent projections
of the Fermi surface

Coulomb $\langle [m(\mathbf{k})]^{-2} \rangle_{FS} - \langle [m(\mathbf{k})]^{-1} \rangle_{FS}^2$

Selection rules

Mattheiss and Weber,
PRB **25**, 2248 (1982)

Selection rules

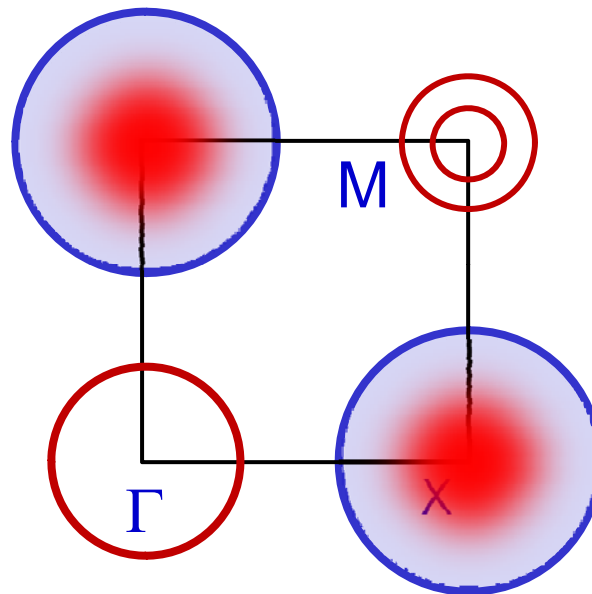

Mattheiss and Weber,
PRB **25**, 2248 (1982)

Selection rules

$$\text{const} + \cos(k_x) + \cos(k_y)$$

$$\cos(k_x) - \cos(k_y)$$

$$\sin(k_x)\sin(k_y)$$

Electronic Raman scattering
strongly coupled conventional SC
cuprates

Nb₃Sn (superconducting state)

Nb₃Sn (superconducting state)

sharp gap inspite of a multi sheeted FS

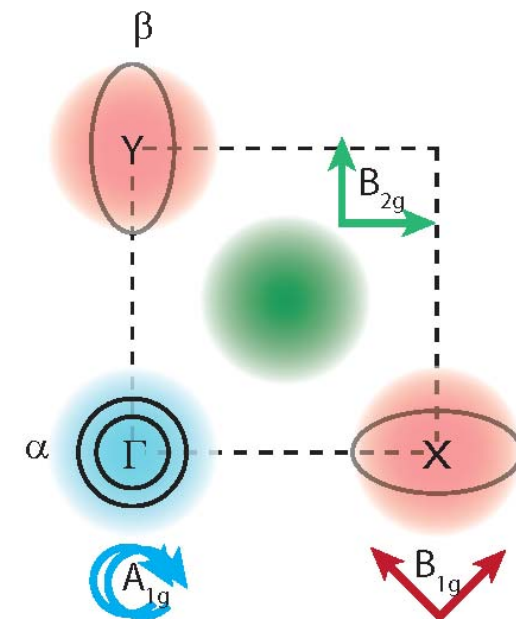

More selection rules for ERS

cuprates

different parts of the Fermi surface

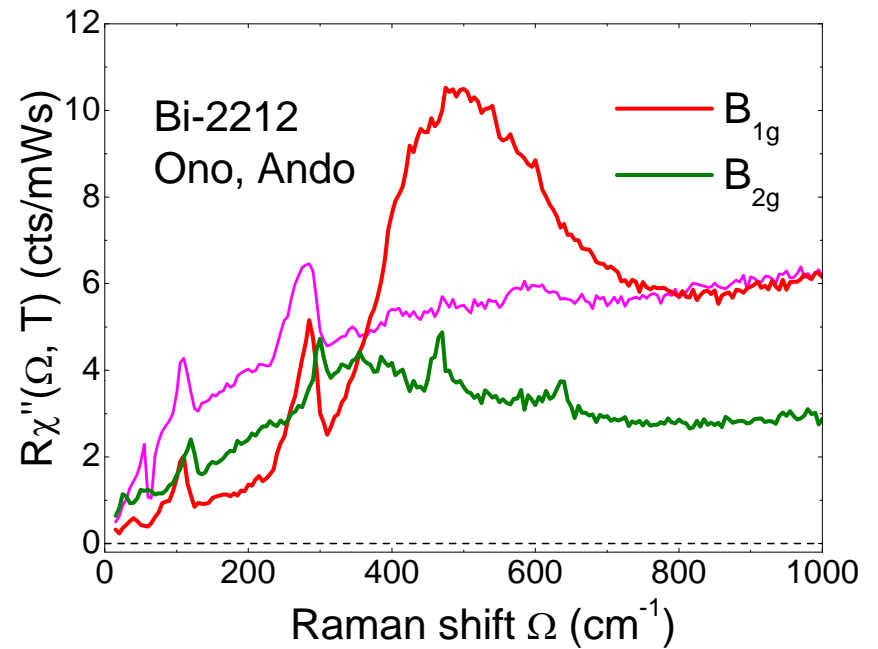

FeAs

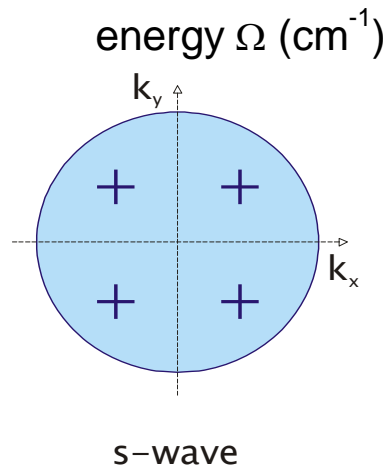

different Fermi surface sheets

T.P. Devereaux and R.H.,
Rev. Mod. Phys. **79**, 175 (2007)

Electronic RS in the superconducting state

Hackl et al.
Physica C
162-165,
431 (1989)

Devereaux
et al. PRL **71,**
3291 (1994)

Electronic Raman scattering
strongly coupled conventional SC
cuprates

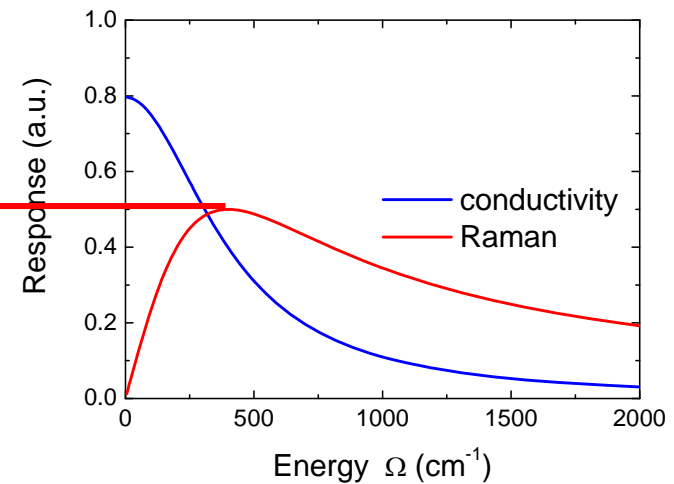

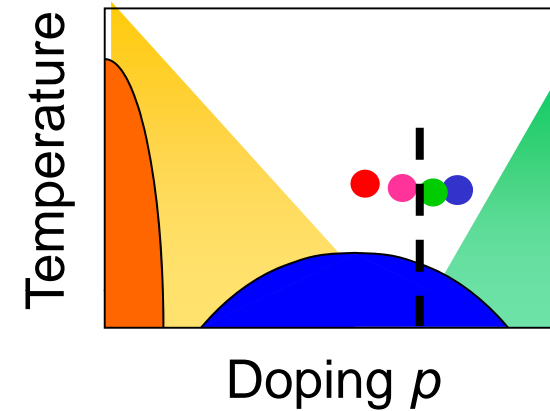

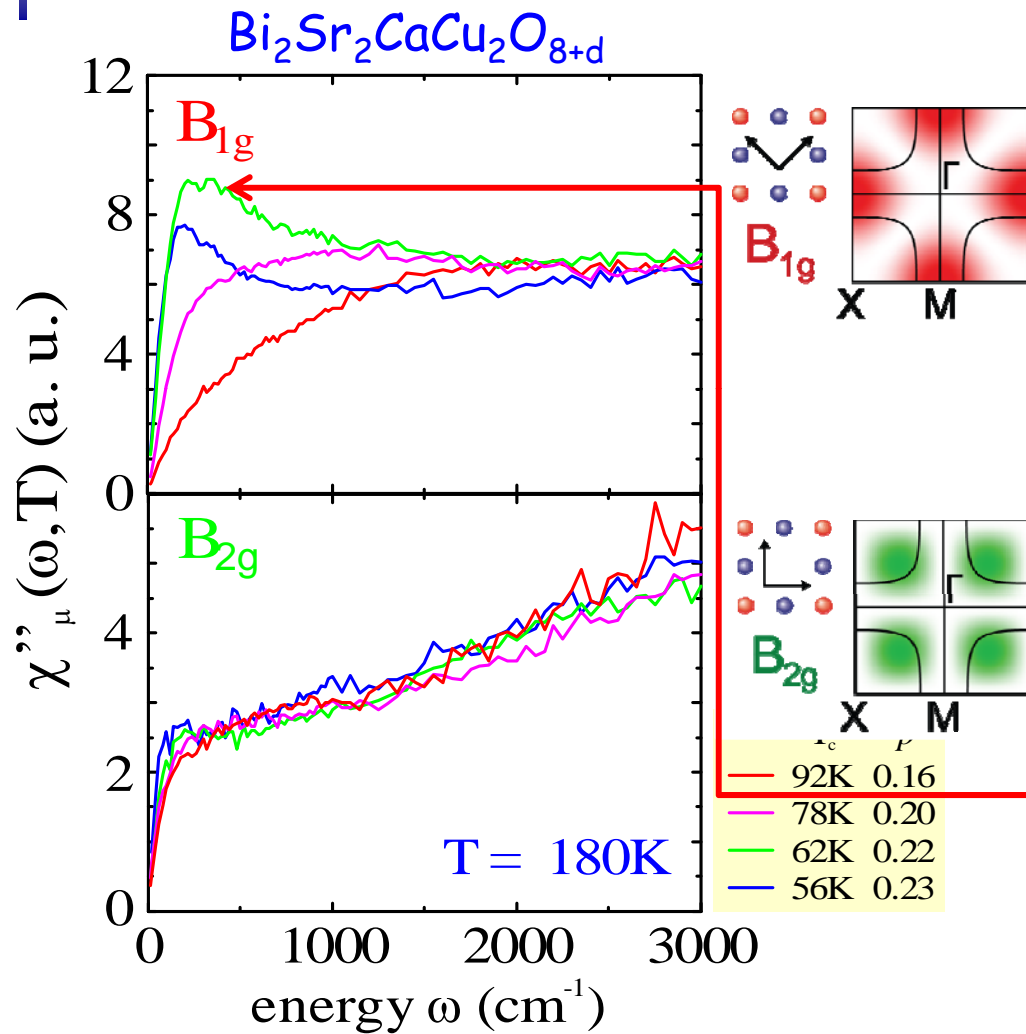

Doping dependence in Bi2212

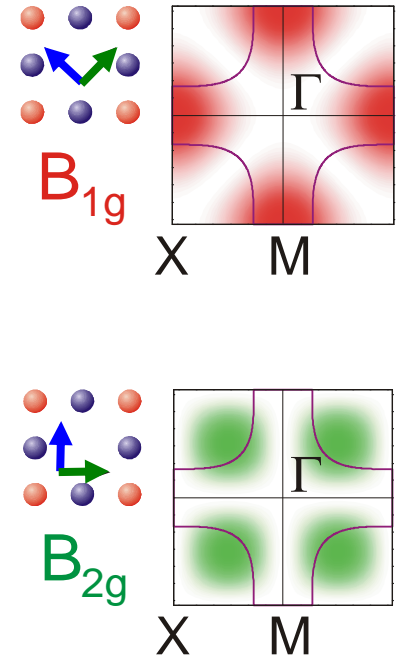

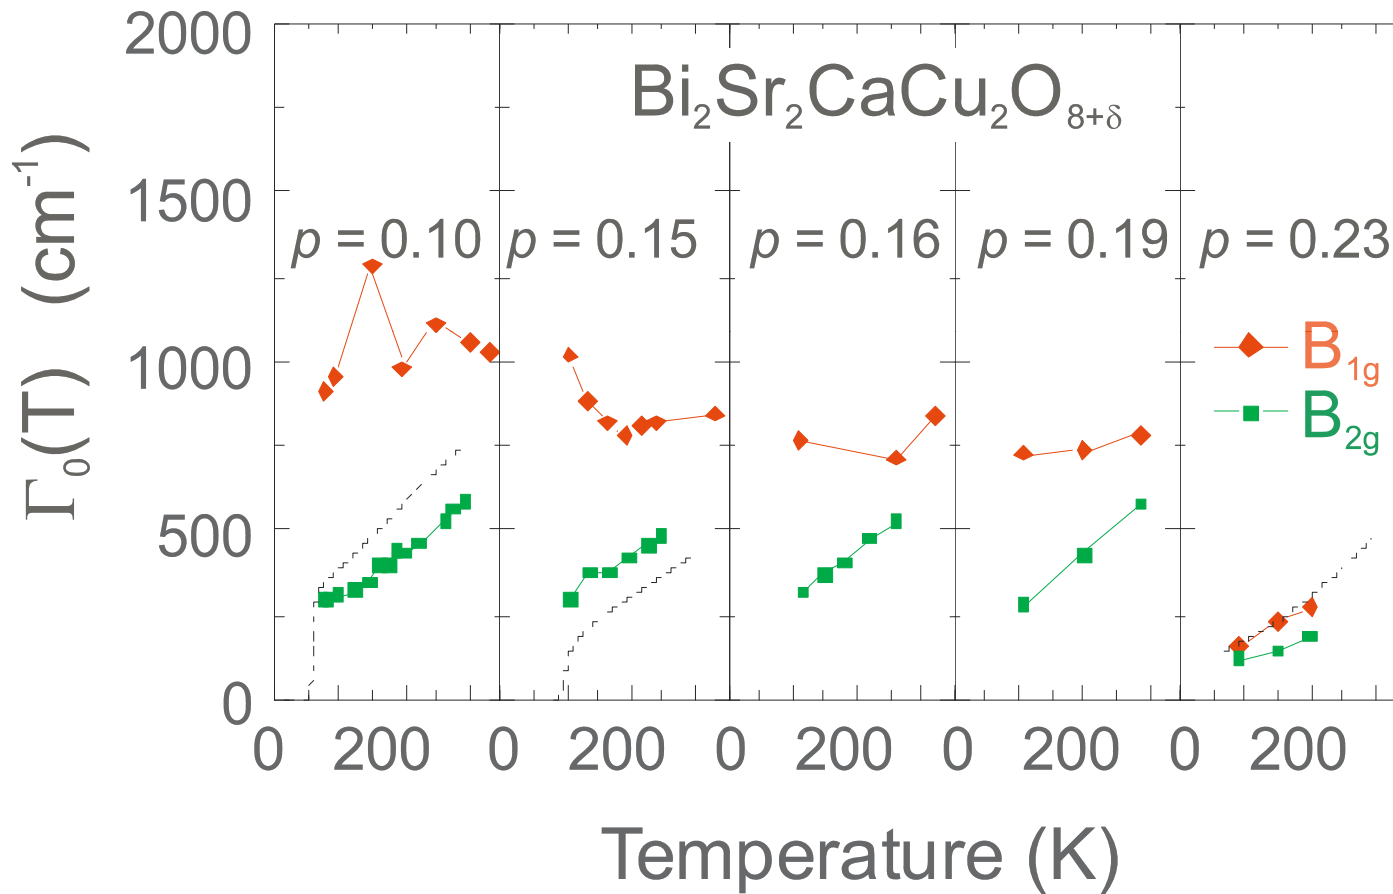

Venturini *et al.*, PRL **89**, 107003 (2002)

Doping dependence in Bi2212

Venturini *et al.*, PRL **89**, 107003 (2002)

Ba122:Co - Bi2212

Opel et al. PRB **61**, 9752 (2000)

Electronic Raman scattering
strongly coupled conventional SC
cuprates

Sefat et al. PRL

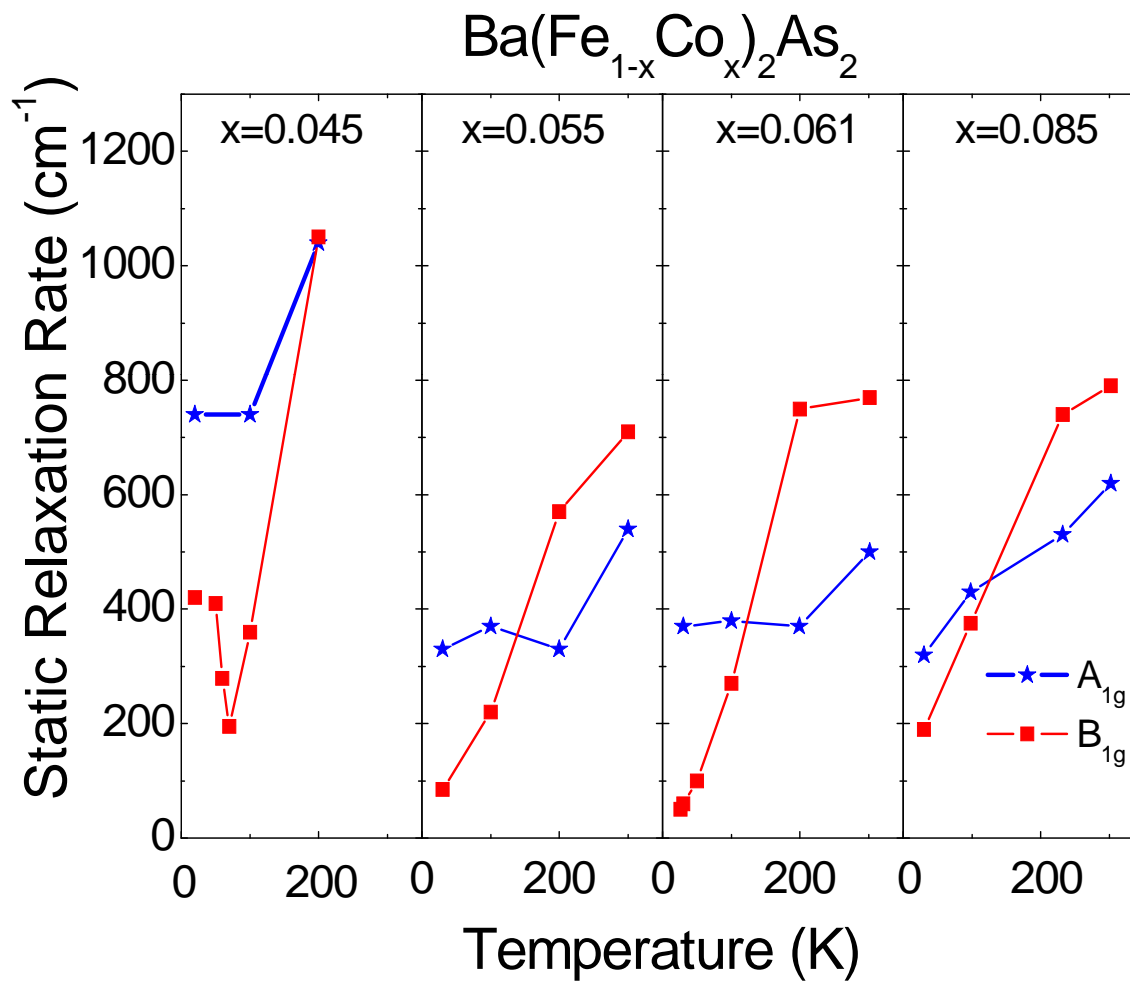

Chu et al. PRB **79**, 014506 (2009)

Mandrus, Canfield, Büchner, Klauss, Dai,....

Ba122 normal state

Raman resistivities

Ba122:Co - Bi2212

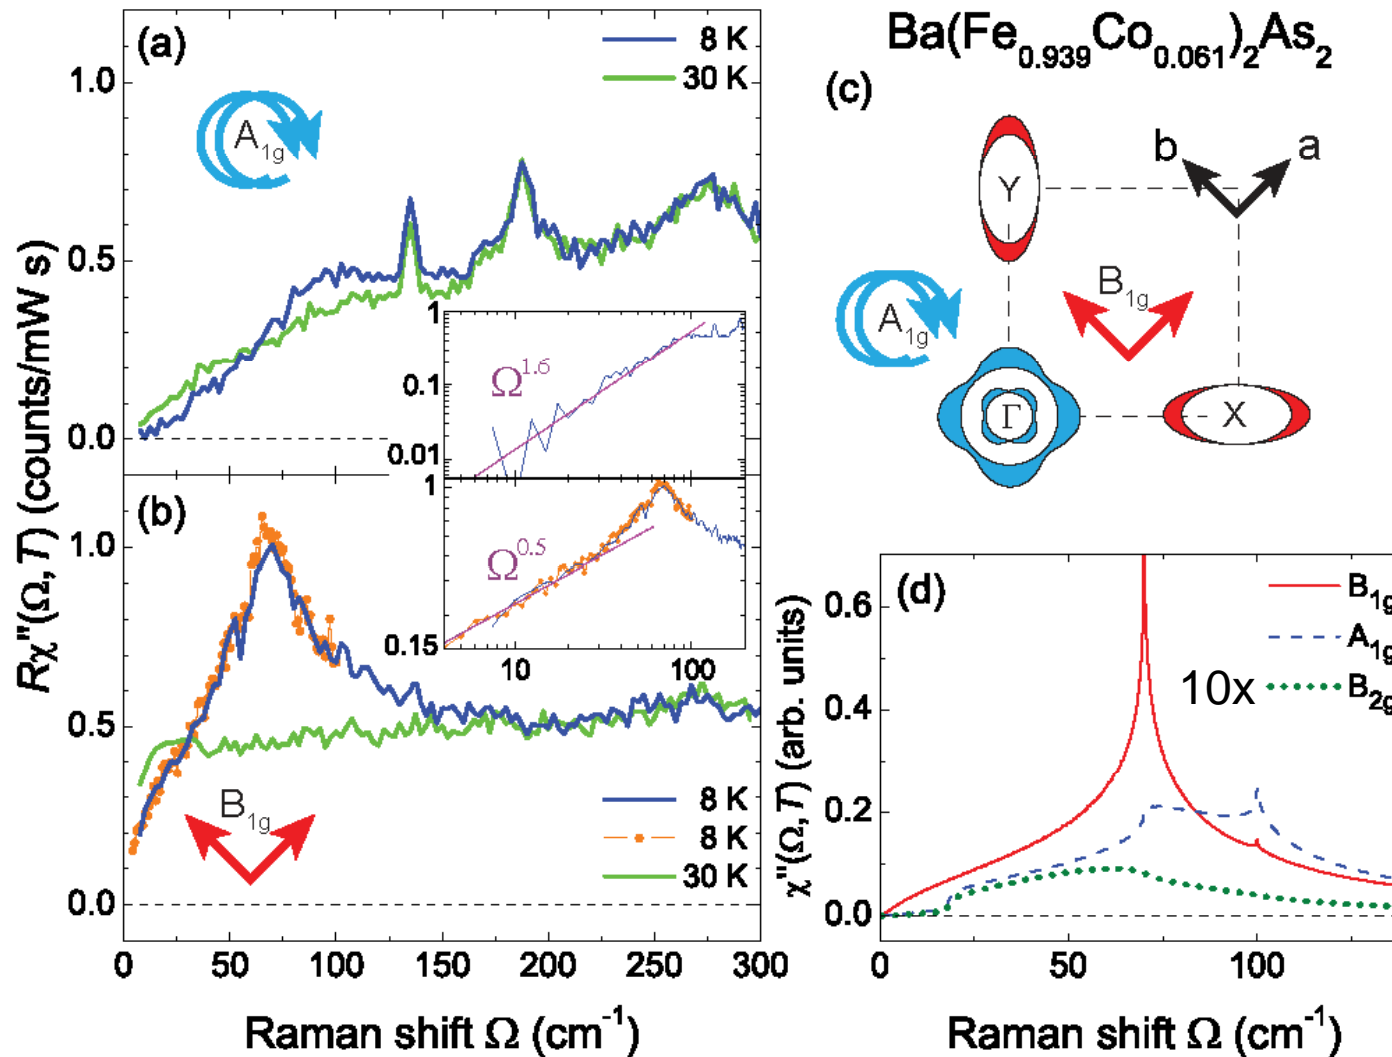

Opel et al. PRB **61**, 9752 (2000)

Ba122:Co - superconductivity

Ba122:Co - superconductivity

- Electronic Raman scattering **projects different parts of the BZ**
- Nearly **isotropic gap in multi-band A15**
- Strong **k** anisotropy of the carrier properties in single-band CuO_2 and multi-band FeAs
- **Unconventional gap in CuO_2**
- **Conventional** but strongly **k**-dependent **gap** in $\text{Ba}(\text{Fe}_{0.931}\text{Co}_{0.069})_2\text{As}_2$
