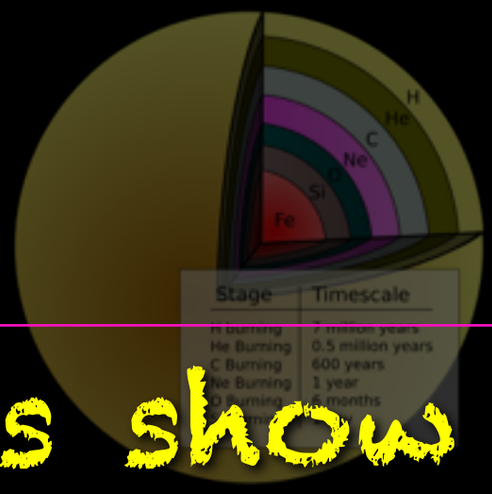
First sources of ionizing photons

Chemical Enrichment

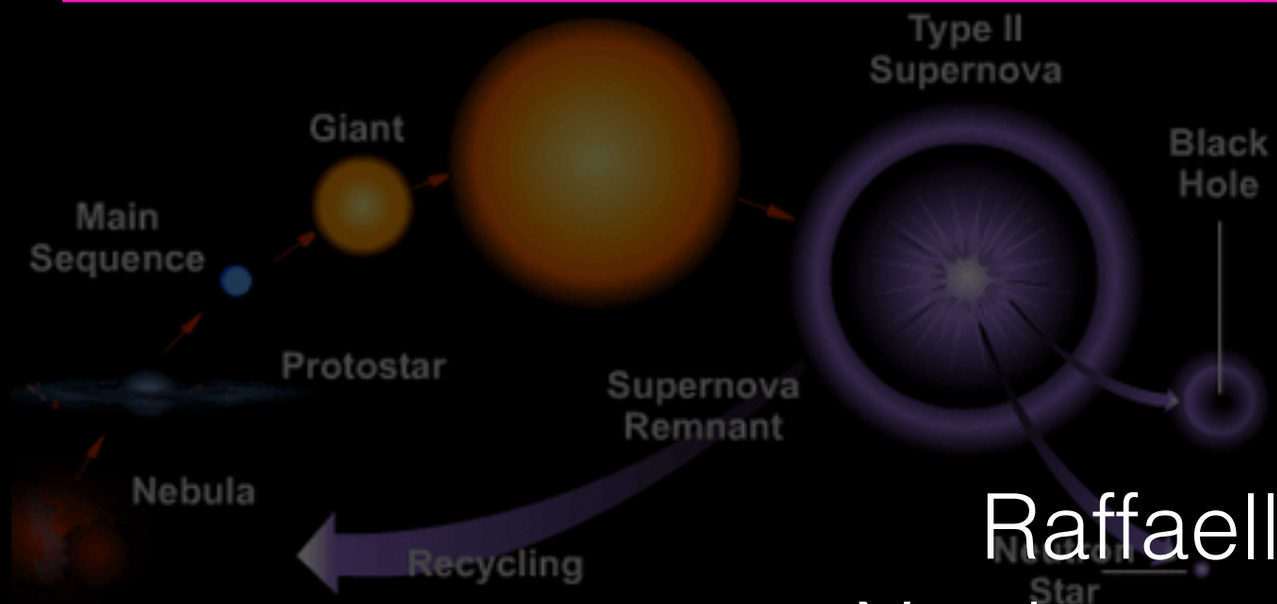


Galaxy Feedback

Deposition of Radiative+ Mechanical Energy

Massive Stars show evidence for enhanced and/or episodic mass-loss at the end of their life

Endpoint of Stellar Evolution



They produce the most Extreme Objects

Laboratories of Extreme Physics (jets)

Sources of GWs and Neutrinos

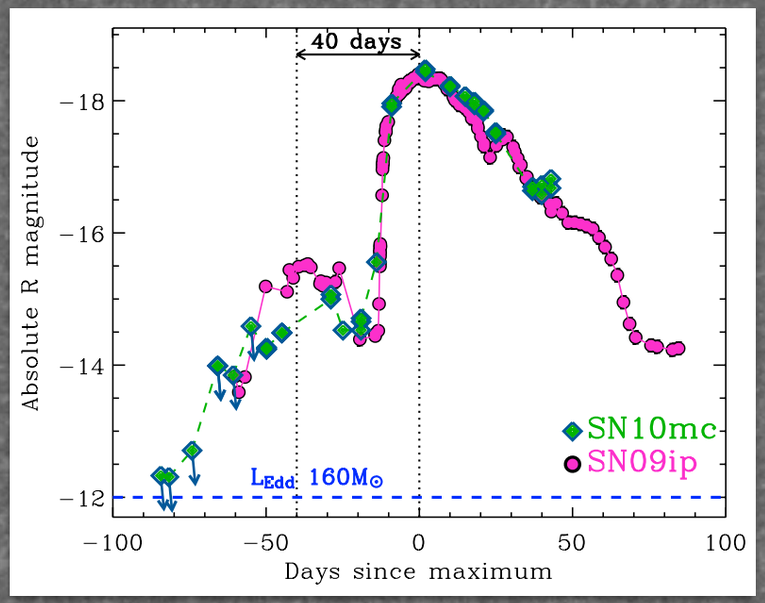
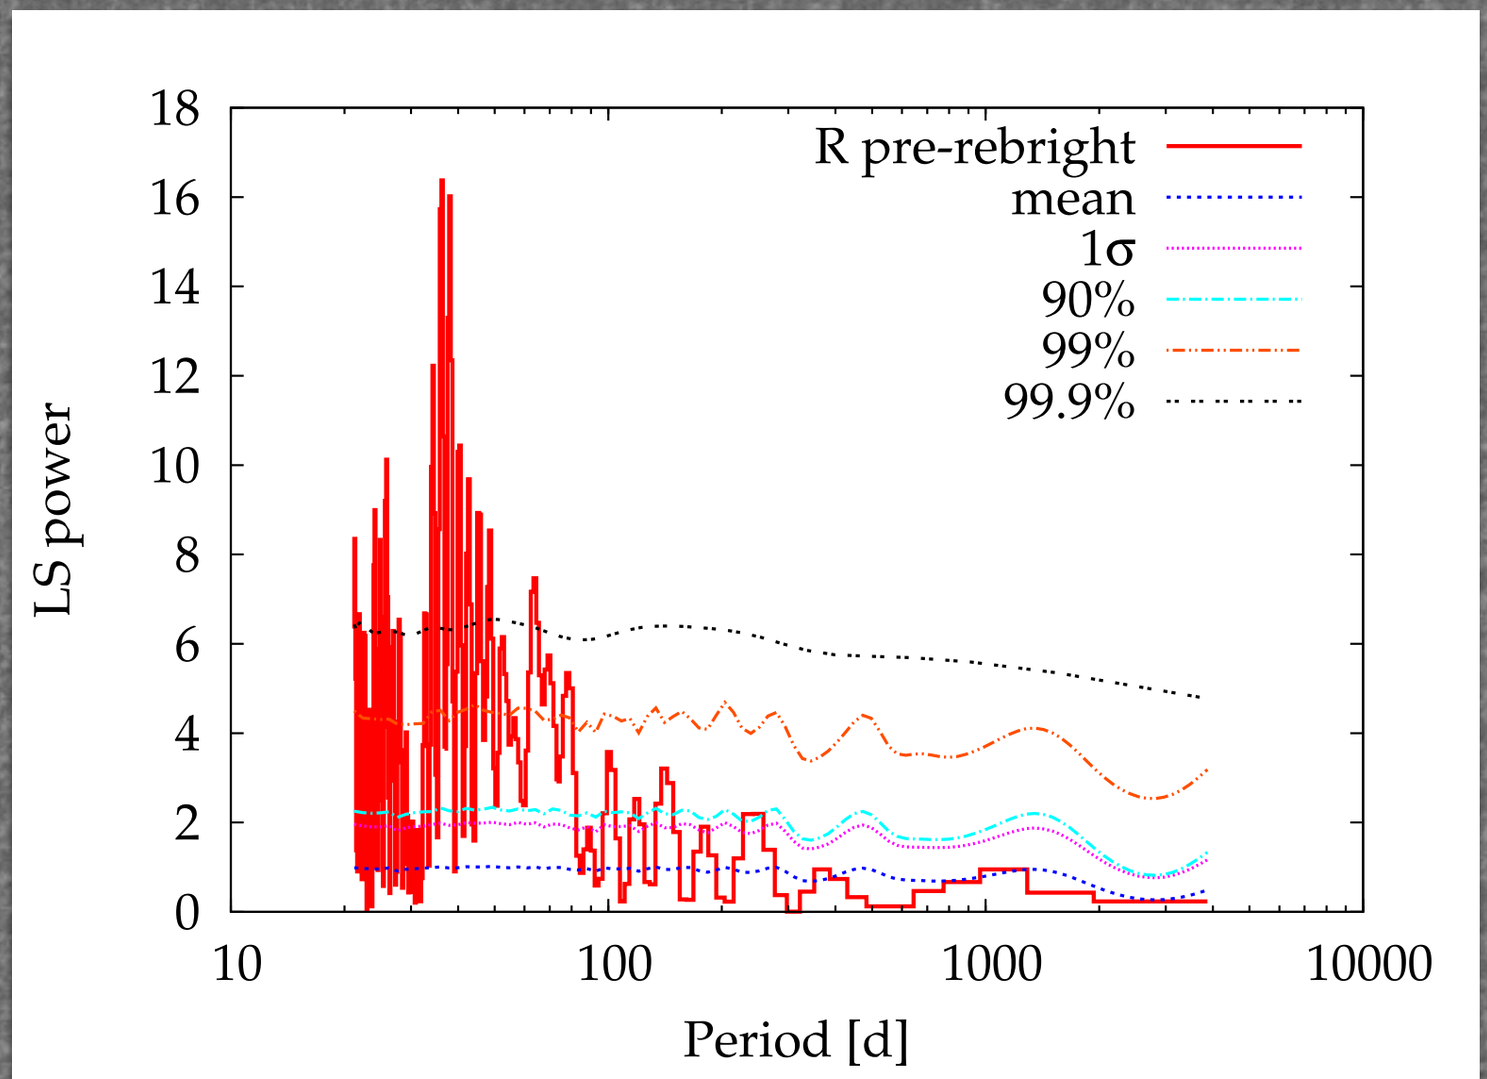
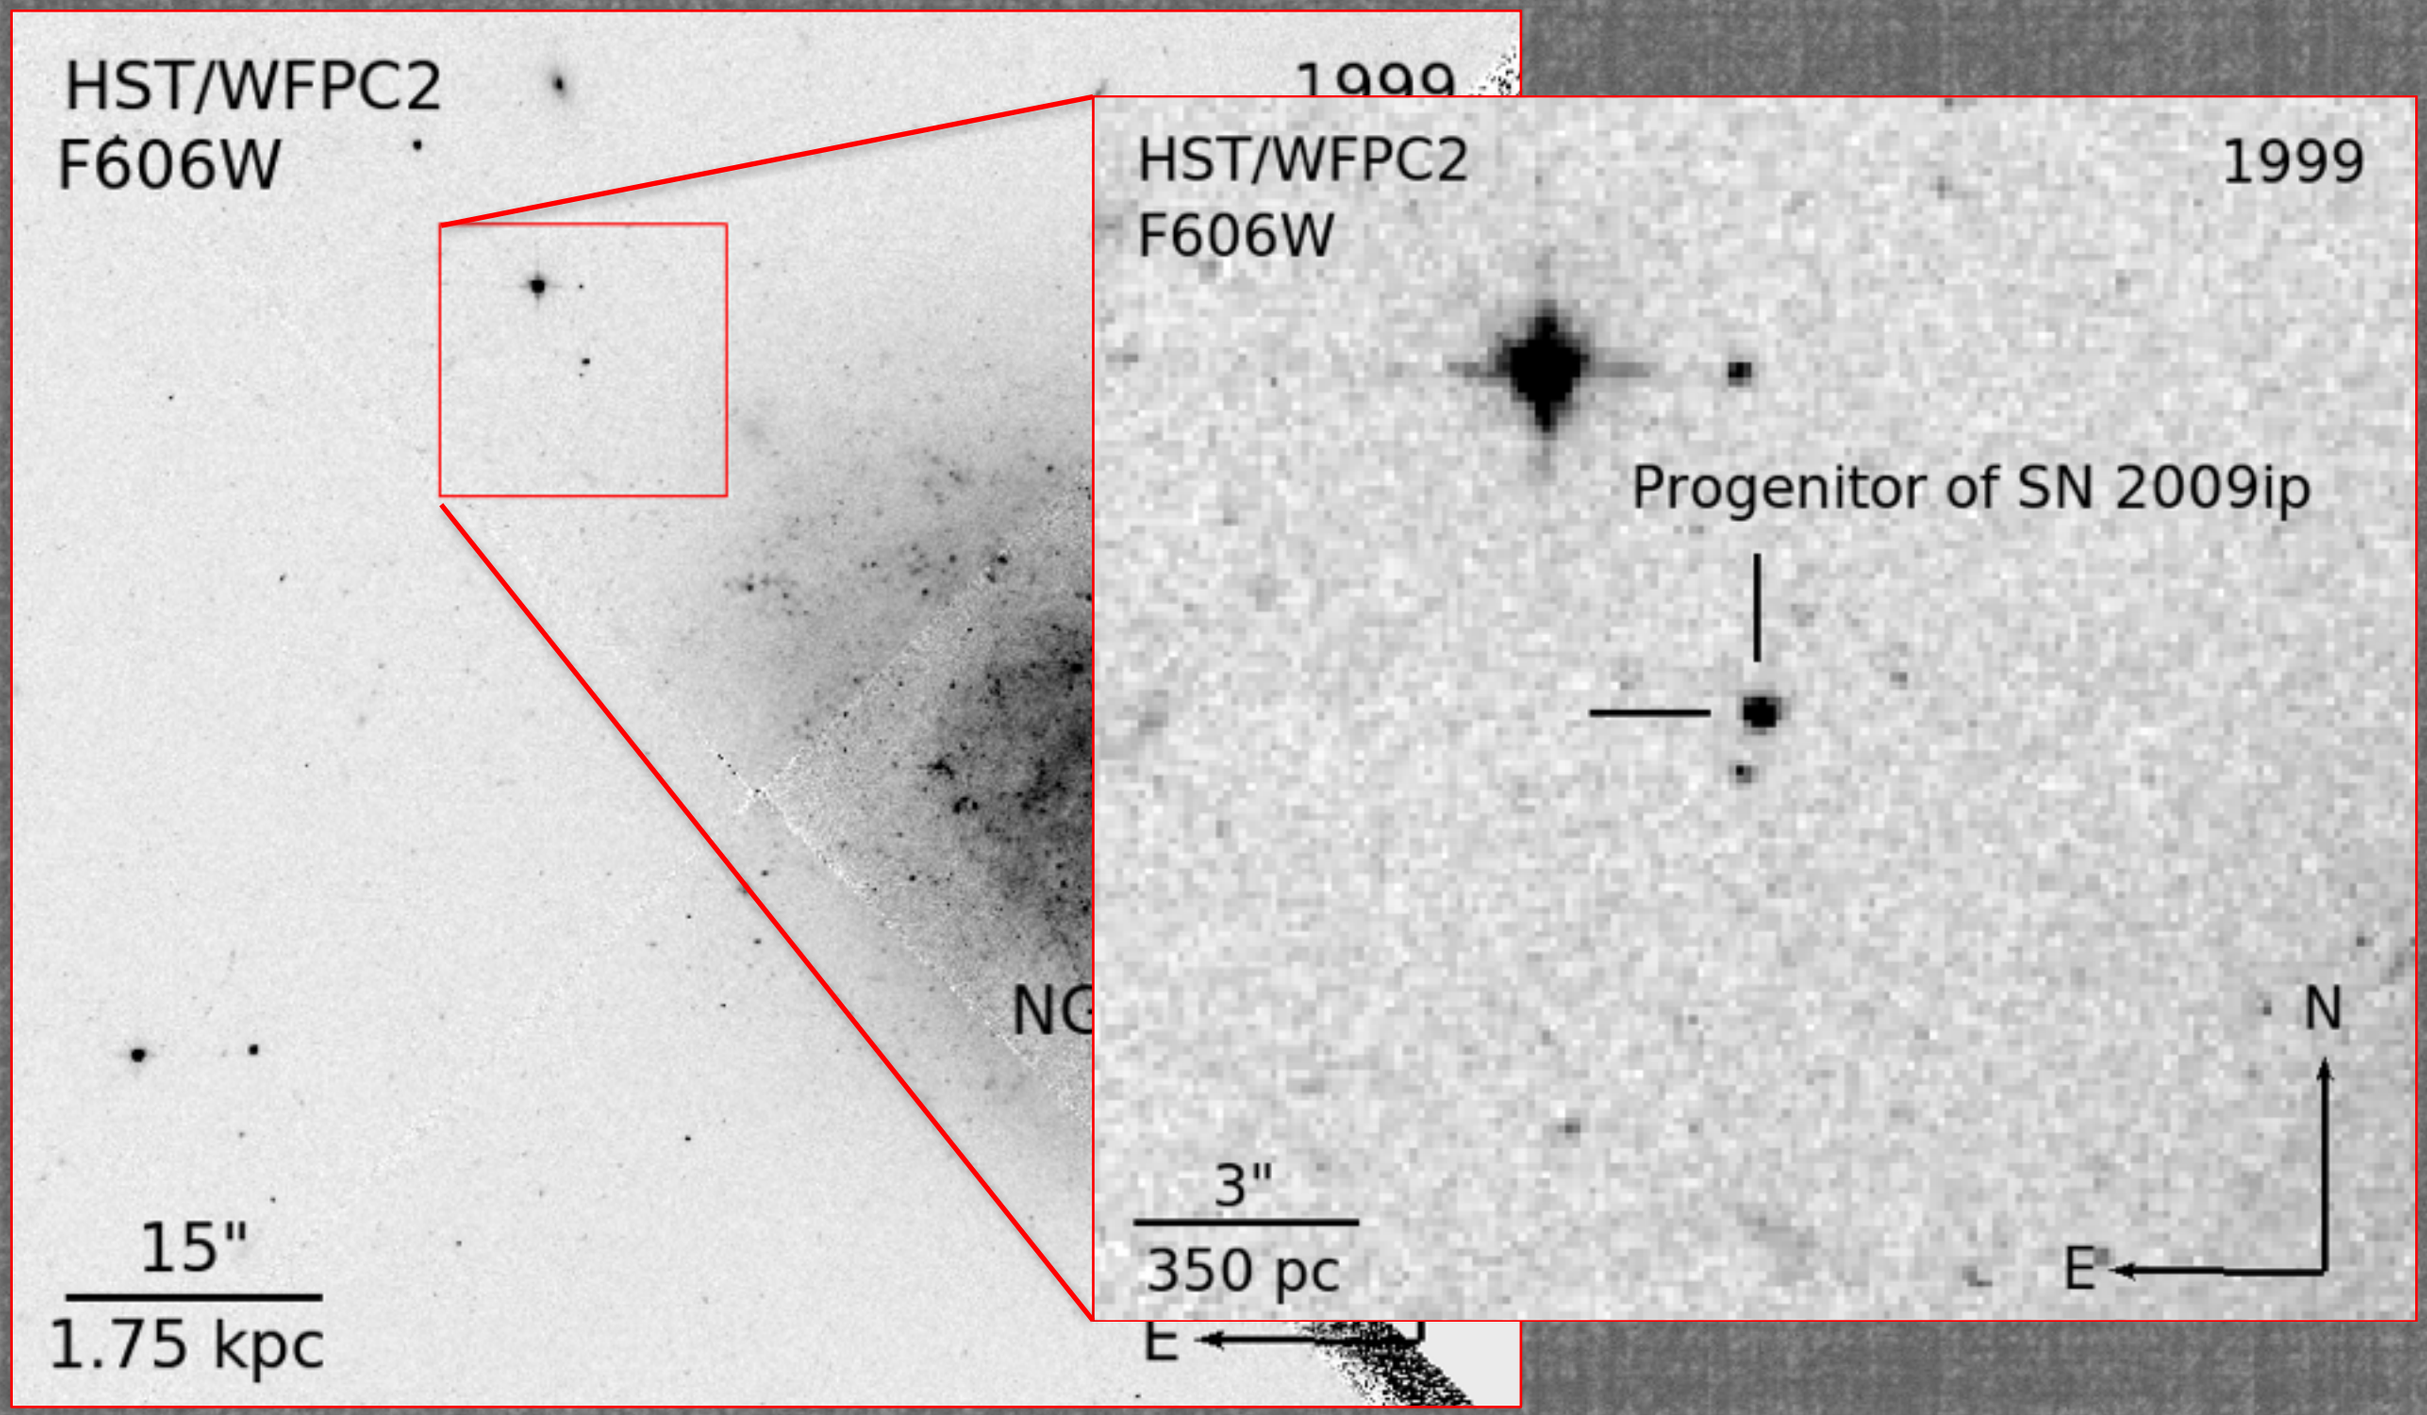
-- Causal connection between the two events
-- “SIMPLE” mechanism
-- Important channel for mass loss





Presence of a **dominant time-scale** common to eruption episodes and the major explosion, shared by completely independent events

→40 days



Massive star: M> 60 Msun

Smith et al, 2010; Foley et al., 2011

"It sort of makes you stop and think, doesn't it."
